We have always claimed that Milwaukee was no more free from a sea of than New York, Chicago, St. Louis, Minacapolis or any other large We based our claim upon surface indications and upon common talk, as is upon a study of the capitalistic system in general.

ent developments have proven the correctness of our views. Not only dling" seem to be the only method by which business is transacted by pard of supervisors (the house of correction and the other county instituats of 'boodla"), many members of our common council, some of them an of the church, are not one iota better than their confreres in New York, or St. Louis. An investigation of the charge of extortion made by a against the members of the license committee was followed by the mest of Ald George Himmetstein of the Ninth ward and has reached such a that the outlook for other members of the council is serious. Rumors it that many saloon-keepers, diva-keepers and gambling houses have been add up, and only this year, but in previous years, and although names are the men refuse to tell the facts when questioned. Many dives on the west side, it is charged, have been paying money to aldermen, but the leters refuse to talk.

This refusal to talk, it is charged, is due to the great effort of prominent me to keep the matter quiet. Mayor David S. Rose going so far as to store to vouch for the honesty of Himmelstein, of the license committee, whom several charges were sworn.

"Jim" Gaines, a colared salcon-keeper, who gave out the first information, til led to the arrest of Himmelstein, has been approached, he says, by a ling politician, and told to keep quiet, and threatened that he would be sorry for it if he acted otherwise. We mention all this to show the faility of any investigation, especially if wa also consider that according to the laws of the state of Wisconsin the bribe giver is liable as well as the

The question whether a politician is venal is hardly raised any longertion is only for how much is his vote or his consent to-be had? It is ous that the corporations and great capitalists consider that agent or obyist the most valuable who can get them the most legislators, aldermen or public officials for the least money. And on the other hand these public strials are on the constant lookent for "graft." Public office has become a while graft under the capitalist system. Stealing from the state or the hty has become so common that it is looked upon with great inby the average citizen. The average business man considers it a semiss for the business man in the "business of politics" to make t of his investment as he cun,-And even the American tradesles man, being imbued with the spirit of the business man, or with the grafting instinct of the politician, often shows an appalling lenlency towards graft and grafters.

THE PASSING SHOW.

EUGENE V. DEBS GIVES SOME TIMELY COMMENT ON MATTERS OF CURRENT INTEREST.

ROBERT G. INGERSOLL, though not an avowed Socialist, was profoundly in sympathy with the working class and his utterance at times showed that he followed closely, if he did not actually embrace the Socialist philosophy. No man ever felt more keenly the inhumanity of the capitalist system,-

its injustice to labor aroused his wrath, the plea of poverty melted his generous heart and the sight of suffering moved him to tears. The great orator was often given to reflections upon the labor question,

but he admitted candidly that he could arrive at uo conclusion that satisfied his heart and brain. To sit near him and to hear him as only he could talk, was not only to be

impressed with his sincerity, but to feel the current of his wonderful, magnetic power, admire his transcendent genius and love and honor the incomparable Seventy years ago to-day Ingersell, aratory's greatest master, was boin. He had the power of a Titan adorned by all the tender sensibilities of a child.

Looking over his works to-day, I found the following eloquent passage which will serve most worthily as an anniversary offering and receive hearty welcome in the literature of freedom:-"The first result of the invention of machinery has been to increase the wealth of the few. The hope of the world is that through invention man can

finally take such advantage of these forces of nature, of the weight of water, of the force of wind, of steam, of electricity, that they will do the work of the world; and it is the hope of the really civilized that these inventions will finally cease to be the property of the few, to the end that they may du the

When those who do the work own the machines, when those who toil control the inventions, then, and not till then, can the world be civilized or free When these forces shall do the bidding of the individual, when they become the property of the mechanic instead of the monapoly, when they belong to labor iostead of to what is called capital, when these great powers are as free to the individual laborer as the air and light are now free to all, then, and not until then, the individual will be restored and all forms of slavery will dis

The author proves that Carnegie increased his net profits from \$3,540,000.00 in 1889 to \$11,000,000.00 in 1899.

It would be interesting to have the editor of Germania advise us hy what "honest methods" Carnegie piled up these millions and had them carted to his awn private vaults. The author also recites the crime of Homestead and he knows the inside

The National Building Trades Council in convention at Denver has en dorsed Hearst and declared in favor of "reform in municipal affairs, the public ownership and operation of public utilities, election of United States senators by direct vote; an income tax; the abolition of government by injunction; the prosecution of all persons engaged in illegal combinations and the impartial enforcement of all laws concerning the trusts .- "

As this is Hearst's platform, word for word, it is quite probable that the "entente cordiale" exists between Hearst and the "leader" of the builfing trades and that the trades will be traded for official recognition in the fertiliziog department of the reform administration.

The convention should have added one more plank to their platform ta make it complete, viz.: The Democratic ownership and Hearstocratic control of the National Building Trades Council.

The following press dispatch is interesting:

Chicago, Aug. 11.-A Trihune Washington special says: "Postmaster Gen eral Payne has decided on an important step, which will practically put the railroads of the country under the protection of the United States government and prevent interference with inter state commerce by strikers. . . . If the Miners' Unlou of Idaho Springs had driven eighteen business men from that community, or even a single one, the troops would have been on the ground within 24 hours, and the miners would have found themselves in some

hull pen, prodded with bayouets, while their wives were subjected to the insults of armed mercenaries. To cap it all, Roosevelt would have emitted a roar in a foot of leaded type about "mob rule" and the "supremacy of law" and he would have been applau

THIRD, that they are NOT in power for your health.

FOURTH, that if you can vote the capitalist class into power and keep your own class out of power, you can also vote the capitalist class out of power and the working class into power. FIFTH, that the labor question is a political question and that you have

got to draw the line, not between Republicans and Democrats, but between workingmen and capitalists. SIXTH, that until you are conscious of your class interests and vote your

When the strikers were defeated, the railroad managers gave Miles's banquet at Kinsley's. He was the hero of the honr. Surrounded and applauded hy the plutocrats he had served he swelled to the limit and then had to let a speech for relief. Socialism, as such, would not affect marriage except as it would free romen from financial dependence.

That alone, however, would work wonders. Sordid motives-wealth, ambition, a "home," social position—all of these would disappear as foundations for marriage.

Undoubtedly, the freedom from the financial problem would make divorce eosier morally and legally even without any great change in public sentiment or laws, but there would in all probability be far fewer separatioos, as marriages would be made under so much more favorable

Remember, that whatever radical ideas individuals may have on this subject, they are not a part of Socialism. Public sentiment will control then, as now, and great changes may come, but all matters of this sort are affected by Socialism only indirectly, no matter how powerful that indirect influence may be.

wage ogreements. Their importance in places recent years has become very great and their power for good should not be weakened by unfair statements. A wage agreement between a union and an employer is not a legol document and enonot be enforced by an appeal to the courts by either party to it. For this reason it should be held all the more sacred us a point of honor by both parties. Any unfairness in the discussion of the subject simply enplayers that did not expire till April 1. The memory and knowledge of these genders the anger which inspires the breaking of these agreements.

The stereolyped expression by the interviewed employers is;

"These agreements are not worth the poper they are written on unless the union's wolking delegate thinks it will pay him best to five up to them. The employer is financially responsible; we can be held to our part of these contracts. The couris will enforce them; hut the union is irresponsible and breaks its agreements whenever it thinks it sees un mivantage in doing so, and we have no redress.

What are the facts? The courts have olwoys held that where one parly to contract was not flunncially responsible and damages for infraction of agreement could not be enforced agoinst one party, this fact released the other party from legal action to enforce such contract. The National Garment Workers' union at one time had a scheme by which each side was to give a bond for the carrying out of the contract. In every case where the union sund on these bonds, the violation of contract being admitted, the courts released the bonds as invalid up-on the ground of "duress." Invarially the courts could be made to believe that the employers had to sign these bonds and agreements or they could not do husiness because of the unions. These experiences have led thoughtful trades unionists to say, "If we must strike to settle things at last why not strike to hegin with?" Courts and employers have united in convincing labor that the "last resort" might inst as well be brought on the stage in the lirst oct. We are entering upon a new era.

WHAT WE SOCIAL DEM. OCRATS ARE AFTER

(Adopted by the Socialist Party in National Convention at Indianapolis July 31, 1901.)

The Socialist party, in national convention assembled, reaffirms its ad once to the principles of International Socialism, and declares its aim to be organization of the working class, and those in sympathy with it, into a pair party, with the object of conquering the powers of government and using the for the purpose of transforming the present system of private ownership of means of production and distribution into collective ownership by the sail

people.

Formerly the tools of production were simple and owned by the individual worker. Today the machino, which is but an improved and more developed to for production, is owned by the capitalists and not by the workers. This waship snahles the capitalists to control the product and keep the workers deposit.

ent upon them.

Private ownership of the mesus of production and distribution is respected for the ever-increasing uncertainty of livelihood and the poverty and missry with the working class, and it divides society into two hostile classes—the capitains and wage-workers. The once powerful middle class is rapidly disappearing in the struggle is any between the capitains class and it is also that the struggle is any between the capitains and wage-workers. the working class, and to the concept of the capitalist class is rapidly disappearing in the and wage-workers. The once powerful middle class is rapidly disappearing in the mill of competition. The struggle is now between the capitalist class and the working class. The possession of the means of livelihood gives to the capitalist the control of the government, the press, the pulpit and the schools, and each less them to reduce the workingmen to a state of intellectual, physical and social inferiority, political subservience and virtual slavery.

The scanomic interests of the capitalist class dominate our entire social control of the capitalist class dominate our entire control of the capitalist class dominate our entire capitalist class dominate our entire control of the capitalist class dominate our entire capitalist class dominate our entire capitalist class dominate control of the capitalist class dominate ca

Inferiority, political subservience and virtual slavery.

The economic interests of the capitalist class dominate our entire social system; the lives of the working class are recklessly sacrificed for profit, was are fomented between nations, indiscriminate slaughter is encouraged and the destruction of whole races is sanctioned in order that the capitalists may appear to the control of the co

But the same economic causes which developed capitalism may so that the same economic causes which developed capitalism are leading to Socialism, which will sholish both the capitalist class and the class of wayworkers. And the active force in bringing about this new and higher order society is the working class. All other classes, despite their apparent in set all conflicts, are nlike interested in the upholding of the system of private waship of the instruments of wealth production. The Democratic, Republican the bourgeois public ownership parties, and all other parties which do not said to the complete overthrow of the capitalist system of production, are alike political.

The workers can most effectively not the same that the capitalist class.

The workers can most effectively act as a class in their struggle against the collective powers of capitalism by constituting themselves into a party, distinct from and opposed to all parties formed by the propertied

While we declare that the development of economic conditions tends in to overthrow of the capitalist system, we recognize that the time and manner of transition to Socialism also depends upon the alage of development research the proletariat. We, therefore, consider it of the utmost importance for Socialist party to support all active efforts of the working class to better in condition and to elect Socialists to political offices, in order to facilitate the state of the condition and to elect Socialists to political offices, in order to facilitate the state of the condition and to elect Socialists to political offices, in order to facilitate the state of the condition and to elect Socialists to political offices, in order to facilitate the state of the condition and to elect Socialists to political offices, in order to facilitate the state of the condition and the second condition are second conditions. taurment of this end.

As such means we advocate:

t. The collective ownership of all means of transportation and communication and all other public utilities as well as of all industries controlled by monopolies, trusts and combines. No part of the revenus of such industries to applied to the reduction of taxes on property of the capitalist class, but to be applied wholly to the increase of woges and shortoning of the hours of the complete, to the improvement of the service and diminishing the rates to the consumers.

a. The progressive reduction of the hours of labor and the increase of wages in order to decrease the share of the capitalist and increase the share of the worker in the product of lahor.

3. State or national insurance of working people in case of accidents, lack of employment, sickness and want in old age; the funds for this purpose to be familished by the government and to be administered under the control of the warding class. ing class

4. The innuguration of a system of public industries, public credit to be used for that purpose in order that the workers be secured the full product of that

Is hor.

5. The education of all children up to the age of 18 years, and state and monicipal aid for hooks, clothing and food.

6. Equal civil and political rights for men and women.

7. The initiative and referendum, proportional representation and the new of recall of representatives by their constituents.

But in advocating these measures as steps in the overthrow of capitalis and the establishmeni of the co-operative commonwealth, we warn the working class against the so-called public ownership movements as an attempt of the capitalist class to secure governmental control of public utilities for the purpose of obtaining greater security in the exploitation of other industries and not for the amelioration of the conditions of the working class.

A Ridicalous Tempest in a Teapot!

The attempt in some quarters to make it appear that the higher priced lecturers on Socialism are 'grafters" on the Socialist move-

ment seems us a very far-fetched and ridiculous one. A worse case of "borrowing trouble" would be hard to find. There are much more important matters worthy of consideration these days.

It is assumed in advance that every honest Socialist is opposed to grafting, as that term is generally understood; that he detests the grafter and would keep him out of the Socialist movement.

But we are told that the Socialist orator who gives his time to making public addresses, who must avoid other employment to be at hand when needed, who must pay travel bills, etc., etc., and who commands the usual prices paid lecturers is a very bad fellow, and the critics hint mysteriously, but are careful not to name the alleged wolves who are fattening on the Socialist mutton.

It is not brave to attack by innuendo and no true Socialist will do it. If he knows of a grafter and believes he ought to be exposed to protect his victims and conceives it to be his duty to make the attack, he will point him out, and CALL HIM BY NAME.

Among the articles we have lately seen on the subject is one signed by John Spargo, editor of the "Comrade," though we do not like to think he is the author of it. Comrade Spargo is usually sound and on the right side, but in this case he is certainly open to the suspicion of playing to the galleries.

He arbitrarily fixes the remnneration of organizers, lecturers and speakers, and anybody who does not choose to accept His schedule of

prices is a grafter! Comrade Spargo ought to know that it is not the amount that constitutes the graft. A two-bit lecturer may be the vilest of grafters

and if there is any danger there is where it is to come from. There are any number who are willing to serve at any price and they are dear

According to Comrade Spargo any lecturer who charges above \$5.00 a day is a grafter.

Liebknecht demanded and was paid seven thousand marks per year for editing Vorwaerts by the Social Democratic party of Germany. He was, therefore, a disreputable grafter and, according to Spargo, should have been kicked out of the party in disgrace.

All speakers must serve under the same conditions and fare exactly alike—otherwise, says Comrade Spargo, they are grafters and must go.
This undoubtedly includes our genial Gaylord Wilshire, the "millionaire Socialist." What right has he to travel in a Pullman state. room like a prince and stop at the same hotel with Rockefeller while the rest of the Socialist speakers have got to be jammed into smoking cars and stop at common lodging houses?

It is true that Wilshire did not get his money lecturing, but it came out of the working class just the same. Every dollar of it is the fruit of exploitation and Wilshire, to serve the Socialist movement according to Spargo, has got to get rid of it, dispose of his expensive wardrobe and travel and dress and serve according to Spargo's regulations or his name goes on the black list as a grafter and any branch that engages him for a lecture is to be boycotted by all the other

When Wendell Phillips, the great abolitionist, went on the lecture platform he charged \$150.00 for each lecture and the people gladly paid it to hear him. Was he a grafter because some cheap skate could have been found to lecture for fifteen cents?

Phillips had sacrificed thousands of dollars to serve the abolitionist movement and no one dreamed of calling him a grafter for putting a price upon his lectures that the people were not only willing to pay, but regarded as a privilege to hear and felt that they were getting full value received.

The statement has been broadly made that any lecturer who charges over five dollars a day is a grafter and the reason given for this is that a Socialist agitator has no right to live above the men out of whose labor he draws his compensation.

Very well! Then why does not Comrade Spargo live in the sub-cellar of a rotten tenement house in Mott street? That is where some of the men live out of whom he gets his living and to be consistent and logical that is where he has got to go and stay if he expects credit for being honest in his professions.

Then again, what right has he to charge one dollar for the "Comrade" when other Socialist publications only get 50 cents per year? They publish 52 issues to his 12 and if he can not get out his paper at the same prices they do then according to his own dictum he is a grafter and must go!!!

En passant, it might be pertinent to ask, are not Comrade Spargo and his associates getting about all they can for the "Comrade," is not this the basis upon which he charges others with being grafters?

The man who serves the Socialist movement purely for pay is a mean, disreputable mcreenary, and the price of his prostitution is wholly immaterial, though he is more contemptible at thirty cents than at a higher price.

The man who can make ten thousand dollars a year or more in the capitalist system and gives it up to serve Socialism at much less than that amount is not a grafter.

If it is the proletarian level that is to be the basis of computation in fixing the fee of lecturers then Comrade Spargo's five dollars a day is an outrageous extertion, for there are tens of thousands who do not get one-fifth that amount, and stealing is stealing, and grafting is grafting if the amount is one cent or a thousand dollars. The principle involved is wholly the same and if it is to govern in this case then NINETY CENTS A DAY must be the revolutionary schedule price for lecturing a ten hour day; or fourteen cents for a lecture of two

Moreover, a lecture is lecture, good, bad or indifferent, and the same price must prevail, and any lecturer who can not meet his obligations at seven cents an hour, or considers his lecture worth eight cents an hour, or more, is a villainous grafter and by all the gods and guardians of the Socialist kindergarten he "has got to go." It has been seriously proposed:

FIRST, that no member be allowed to speak under other than the

auspices of the Socialist party.

SECOND, that three dollars a day shall be the maximum rate of

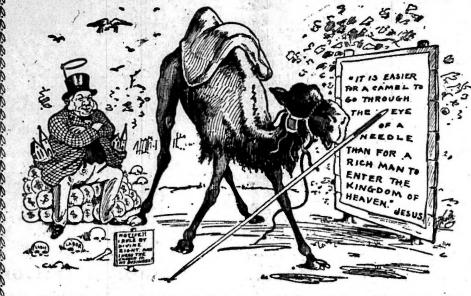

Therefore if a member of the party is invited to speak under the auspices of a labor union, or at a Chautanqua assembly where five thousand people are gathered, and offered \$25.00 or \$50.00 for his lecture and accepted this in preference to speaking to a corporal's guard for \$1.50 under the auspices of a Socialist local, he is a grafter and his

The party has not only the right, but it is its duty to fix the compensation of its own lecturers and organizers and this can be done upon a basis that will be satisfactory to every reasonable man. Beyond that

Vandervelde of Belgium held that the question should be held for discussion by the Amsterdam Congress in 1904 when the matter could be treated in its entirety, but in the meantime that the International Bureau should recognize the situation officially and take such immediate steps as west deemed best. Furthermore, the delegates placed themselves on record as being opposed to restrictive legislation against the employment of foreign labor, and that the delegates from the countries immediate steps at the ballot box as to whether they are the restrictive gates from the countries immediately interested in the matter, viz.

The nrd of the French Socialists subsided at this reply, and they decided to allow the Italian king to visit france in peace.

Of course, none of this argument applies to the Tsar, for he is not a constitutional monarch and the Russians have no chance to freely expression against the employment of foreign labor, and that the delegates from the countries immediately interested in the matter, viz.

A member of the party has the undonhted right to lecture under such anspices and circumstances and for such remuneration as may be mutually agreed upon. The party is under no obligation to engage him; members are not bound to go and hear him. The following appeared in the Milwaukee Journal of Aug. 17:

Want Socialist on Ice for ten Years Dr. Berger objects to this and wants an investigation.

Ambition, that sin by which the angels fell, has permeated the inner organization of the Social Democratic party of Milwaukee, and an investigation of charges of this sort, brought against Dr. H. C. Berger, is now on.

The doctor says he demanded the investigation, and be charges Victor L. Berger with trying to control the affairs of the Social Democrats, with the purpose of crowding out all who will not endure his directions and imperative commands. He specifically charges Wisconsin State Federation of Labor that the editor of the Vorwaerts, the official organ of the party, and the property of Victor L. Berger, The F. F. Adams Tobacco Co., Milwaninsinuated that he, Dr. Berger, "should be kept on ice for ten years before he is allowed to run for office."

This statement, the doctor says, was made recently, and intended to point directly to the efforts being made by his friends to ad-

The Star theater opens its regular season tonight. Bright and fresh in new row afternoon. The season will be insugarated with the only Weber and Field's musical company, "Hoity Toity." This organization is practically known the country over, its many taneful melodies have been sung and whistled ever since their introduction to the New York stage. This latest success of Weber and Field's has just completed a year's run at their Broadway theater and it will be seen at the Alhambra intact. There are many things about it that may be termed features, but it seem's scarcely necessary to go into these for Manager Miller says there is no question but that the organization will commend itself instanter to all classes of the way of a specialty number. There will be plenty of favorite performers with "The Blue of favorite performers with "The Blue of favorite performers with "The Blue of the season tonight. Bright and fresh in new freeding, new draperies, a general removation of the interior, the little theater is going to represent a very animated sight after the "Blue Ribbon (offer his patrons the latest of the season, a New York roof garden attraction, whose success in the Metropolis in the past summer made) it talked about more than most of the midsummer offerings there. Ned Wayburn, stage manager for Klaw and Erlanger, is responsible for the "Jerkey Club," one of the most unique acts introduced in the way of a specialty number. There will be plenty of favorite performers with "The Blue of favor

The nub of the performances hinges

about eccentric characters, aptly named about eccentric characters, aptly named and designated as they always are in a Weber and Field's show. Messrs. Kaffee-kuken and Schnitzel are after Philip Sauerbraten's cash acquired in the delicatessen handlung. But Lady Grafter comes to the rescue and acquires the most of it herwelf. There are many odd characters, the most tuneful of melodies, those that are whistled after the performance, both sentimental and frivolous, and while the whole performance can not show much of a plot frivolous, and while the whole per-formance can not show much of a plot there is one there and it is quite of
